A&TC
CHEMICALS

ATC Chemical is a flexible and modern chemical products trading company that in a short time we have managed to position ourselves widely in the international and local markets.

ABOUT US

A&TC Chemicals, with only 9 years of existence, we have developed strong strategic alliances with various manufacturers that allow us to provide greater commercial capacity in favor of the client.

Our company is young, but it is also made up of excellent professionals in the area with more than 25 years of extensive experience, with a great commitment to responsibility, constant work, focused as the highest level, and always based on providing the best service. with the best quality products for our clients.

We provide technical assistance to our clients, regardless of their commercial size or commercial assistance, and we even offer formulations that allow them to develop new products in their natural markets.

As a trading company & exporter of:

*Natural Colors,
Blend Colors,
D&C Colors & Blend Colors,
FD&C Colors,
Food Colors,
Lake Colors,*

*Our colors are widely used in the
majority of industries, such as:*

*Agrochemicals,
Beverages & Foods,
Cosmetics,
Household Products,
Personal Care & Laundry,
Pulp & Paper, and
Textiles.*

A&TC Chemicals, work with the topmost color manufacturers in the world, their products are manufactured according to international standards, and their quality is verified by implementing extensive quality checks at every stage of production.

As a result, each product is manufactured in accordance with the most requirement of each market, using not only ISO9000 in every stage of the production process to ensure that quality always is present too.

MISSION

Providing the greatest possible support to our clients, allowing them easy access to raw materials and chemical products of proven excellent quality.

Maintain and preserve the environment in its most natural state, ensuring the future of our future generations.

Strengthen our purchasing program to provide greater flexibility to the customer, help them in their requirements with the responsibility of providing ways to optimize their inventories, creating a more useful and healthy economy.

The strength of our distribution and marketing network provides channel openings to reach all levels of the global market.

VISION

Consolidate ourselves in our area as the most reliable and flexible supplier of our Clients, providing distribution channels to manufacturers.

Use technology to contribute to efficiency and excellence in our successful relationships with our suppliers, customers, employees, creating among all a mutual loyalty for satisfaction and common effort.

WE OFFER

A&TC Chemicals, in addition to quality colors, also provides an extensive range of raw materials and chemical products for different applications and areas.

COSMETIC COLORS

”

COSMETIC PIGMENTS

INORGANIC PIGMENTS

Inorganic pigments have a more limited range of colors but are more stable at high temperatures and less soluble in most solvents, also Inorganic pigments are more economical than organic pigments, due to their simple production and availability.

Main Uses

Blush, Compact, Eye Shadow, Eyeliner, Foundation, Lip Balm, Lip Gloss, Lipstick, Mascara, Nail Paint, and others.

Inorganic Pigment Colors

Product Name	Synonyms	Pantone®	E.C. No.	C.I. No.	Soluble in Solvents
Black Iron Oxide	Pigment Black 11		235-442-5	77499	✓
Brown Iron Oxide	Ferric [III] Oxide		257-870-1	77491, 77492, 77,499	✓
Carbon Black	Pigment Black 7		215-609-9	77266	✓
Chromhydroxid Green	Pigment Green 18		215-160-9	77289	✓
Chromium Oxide Green	Pigment Green 17		215-160-9	77288	✓
D&C Black 2	Pigment Black 7		215-609-9	77266	✓
Ferrosoferric Oxide	Iron Blue		237-875-5	77510	✓
Manganese Violet	Pigment Violet 16		233-257-4	77742	
Red Iron Oxide	Eisenoxide		215-168-2	77491	
Titanium Dioxide	Pigment White 6		236-675-5	77891	
Ultramarine Blue	Pigment Blue 29		215-111-1	77007	
Ultramarine Pink	Pigment Red 259		235-811-0	77007	
Ultramarine Violet	Pigment Violet 15		235-811-0	77007	
Yellow Iron Oxide	Pigment Yellow 42&43		257-098-5	77492	

✓ D&C = Drug and Cosmetic

Additional Comments:

Inorganic pigments are made up of minerals and salts and are based on oxide, sulfate, sulfide, carbonate, and other such combinations.

Inorganic pigments have larger particle sizes, lower coloring strength, and more opacity than organic pigments. Inorganic pigments are cheaper, more insoluble, and more resistant to light, heat, and chemicals than organic pigments.

Inorganic pigments can provide more stable and durable colors than organic pigments, especially in the white, black, blue, green, and earthy range.

COSMETIC PIGMENTS

ORGANIC PIGMENTS

A solvent soluble colors are also called solvent-based dyes, are not soluble in water but soluble in organic solvents or plastics, some of these typical solvents are non-polar mediums, such as alcohols, ethers, ketones, aliphatic, and aromatic hydrocarbons, oils, fats, waxes and chlorinated hydrocarbons

Main Uses

Lipstick, Lip Gloss, Lip Balm, Compact, Mascara, Blush, Eyeliner, Nail Paint, Foundation, Eye Shadow

✓ D&C = Drug and Cosmetic

Additional Comments:

Organic pigments, are applied as finely ground solid particles mixed with a liquid.

Organic pigments have high coloring strength and can provide bright and vivid colors.

Organic pigments are more expensive, more soluble, and more susceptible to fading and degradation than inorganic pigments.

Organic pigments can provide brighter and more vivid colors than inorganic pigments, especially in the red, orange, yellow, violet, and magenta range.

COSMETIC PIGMENTS

ORGANIC LAKES

EC approved organic lakes are certified by the European Commission (EC) as safe and compliant with the cosmetic legislation of the European Union (EU). They must meet the purity criteria and specifications set by the EC and undergo regular testing and monitoring.

Main Uses

Lipstick, Lip Gloss, Lip Balm, Compact, Mascara, Blush, Eyeliner, Nail Paint, Foundation, Eye Shadow

EC Approved Organic Lakes

Product Name	Synonyms	Pantone®	E.C. No.	C.I. No.	Soluble in Solvents

Certificates - ISO 9001, FSSC 22000, ISO 14001

Calle 90, Local Galpón Nro. E-17 Cívico 83-40 Zona Industrial, Carabobo
(4ta. Transversal) Valencia, Edo. Carabobo | VENEZUELA

TYPES OF SOLVENTS

1,2-Dichloroethane	▪ 182.2°F (83.47°C)
1,4-Dioxane	▪ 213.8°F (101°C)
1-Butanol	▪ 243.9°F (117.7°C)
Acetic Acid	▪ 244.4°F (118°C)
Acetone	▪ 132.8°F (56°C)
Acetonitrile	▪ 179.6°F (82°C)
Benzene	▪ 176°F (80.1°C)
Butanone	▪ 175.4°F (79.64°C)
Carbon Tetrachloride	▪ 170.1°F (76.72°C)
Chloroform	▪ 142.2°F (61.2°C)
Diethyl Ether	▪ 94.28°F (34.6°C)
Dimethyl Sulfoxide	▪ 372.2°F (189°C)
Dimethyl-Formamide	▪ 307.4°F (153°C)
Ethanol	▪ 173.1°F (78.37°C)
Ethyl Acetate	▪ 170.8°F (77.1°C)
Ethylene Glycol	▪ 387.1°F (197.3°C)
Hexane	▪ 155.7°F (68.7°C)
Isopropyl Alcohol	▪ 180.5°F (82.5°C)
Methanol	▪ 148.5°F (64.7°C)
Methylene Chloride	▪ 103.3°F (39.6°C)
Tetrahydrofuran	▪ 150.8°F (66°C)
Toluene	▪ 231.1°F (110.6°C)
Trichloroethylene	▪ 189°F (87.2°C)
Xylene	▪ 140°C (284°F)
